

Formwork Builder - Findings & Copy Notes

Advertising the self-serve Formwork Builder. Drive concreters to configure their curved formwork online - never 'send CAD'. Guarantee lines gated.

The product (what we're advertising)

Formwork Builder: 'Complete Curved Formwork. Configured Online. Delivered Ready to Assemble. Build the whole system - not just the radius.' Concreter configures a curved bench seat / curved wall / firepit online, gets a price, we deliver the whole system ready to assemble and pour.

Snapshot (demand from CNC Cut bespoke jobs)

Metric	Value
Win rate (bespoke proxy)	50% (14 won / 14 stalled) - the opportunity
Avg job value	~\$1,000 - \$2,800
Buyers	Concreters, formworkers, landscapers
Key names	Concretum, Top Form, Policrete, Formworx, Cubic, Burrows

Who buys & how

Concreters and formworkers who CAN build formwork themselves. The builder must beat their own method: configure online, get an instant price, delivered ready to assemble - no day bending ply, no waiting on a quote. (Half of bespoke formwork quotes stalled un-sent - the builder removes that.)

Their words (use verbatim in copy)

- curved formwork
- the whole system, not just the radius
- top and bottom plates and face ply
- perfect curve / off-form finish
- we can build on site
- ready to assemble
- cut to your set-out

What they ask (the builder answers each instantly)

- l/m rate? -> instant price in the builder
- Which ply for the finish? -> built into the system
- Achievable? -> configure it and see
- Turnaround? -> made to order, delivered ready to assemble

The angle to lead with

Beat their in-house method. Lead on 'configure the WHOLE curved formwork system online, instant price, delivered ready to assemble' - speed + finish + no-slog, no quote wait. Never 'send us your set-out to quote'.

Copy notes - builder-first (no 'send us CAD')

Hero line

"Stop hand-building curved formwork. Configure the whole system online in the Formwork Builder - delivered ready to assemble and pour."

Headline options (each passes Urgent-Unique-Specific-Useful)

"Curved bench seat? Configure the whole formwork online - delivered ready to assemble."

"Stop bending ply by hand. The Formwork Builder builds your curved formwork online."

"Complete curved formwork, configured online. Priced instantly, delivered ready to pour."

"Not just the radius - the whole curved formwork system, configured online."

"A day bending ply, or a few clicks? Configure your curved formwork in the builder."

Lead paragraph (landing / ad)

The Formwork Builder turns curved formwork into an online order: configure your curved bench seat, curved wall or firepit, get an instant price, and we deliver the whole system - top and bottom plates, face ply, the lot - cut and ready to assemble. No day bending ply around a stringline, no waiting on a quote.

Answering their questions (self-serve framing)

- l/m rate? - priced instantly in the builder.
- Which ply for the finish? - built into the system, spec'd for you.
- Achievable? - configure it online and see the price.

Note for decisions

Highest-upside product. Lifting conversion off 50% is a big unlock, and the lever is the builder itself - instant price removes the stall, and 'ready to assemble' beats the DIY slog. Push hard.

Craftons marketing engine. Demand data = CNC Cut's bespoke curved jobs (the intelligence). Advertising target = the Craftons self-serve online builders. 21 Jul 2026. Working docs: repo research/market-intel/.
