

Architrave Builder - Findings & Copy Notes

Advertising the self-serve Architrave Builder. Low volume, HIGHEST value per job. Drive joiners to design online - never 'send drawing to quote'.

The product (what we're advertising)

Architrave Builder: 'Complete Curved Architraves. Configured Online. Delivered Ready to Install.' Design custom curved architraves for doors and windows online, get an instant price, delivered ready to install. No per-arc setup fee.

Snapshot (demand from CNC Cut bespoke jobs)

Metric	Value
Win rate (bespoke proxy)	Small n, converts well (3 won)
Avg job value	~\$2,300 (a single \$3,641 job) - highest per job
Buyers	Joiners, builders
Competitor	Australian Moulding charges a \$200/arc setup fee

Who buys & how

Joiners and builders with arched doorways / curved-head windows. Low volume but biggest tickets. Marketing job: get them to design the arch in the builder and order online, undercutting the incumbent's per-arc setup fee.

Their words (use verbatim in copy)

- curved architraves and straight architraves
- match close or similar to the design
- ball park how much... inc material
- the arch's in the drawing
- for doors and windows
- ready to install

What they ask (the builder answers each instantly)

- Ball-park cost inc material? -> instant price in the builder
- Match my profile/design? -> design it to spec online
- Turnaround? -> made to order, delivered ready to install

The angle to lead with

Lead on 'design your curved architrave online, instant price, no per-arc setup fee, delivered ready to install'. The self-serve builder IS the wedge vs the incumbent's setup fee + wait.

Copy notes - builder-first (no 'send us CAD')

Hero line

"Arched doorway? Design your curved architrave online - priced instantly, delivered ready to install."

Headline options (each passes Urgent-Unique-Specific-Useful)

"Curved architraves, configured online. Instant price, no per-arc setup fee."

"Design custom curved architraves for doors and windows - priced online, delivered ready to install."

"No \$200-an-arc setup fee. Design your arch in the builder, get the price now."

"Bending MDF around an arch never comes up clean. Design it online, we deliver it ready to install."

Lead paragraph (landing / ad)

The Architrave Builder lets you design custom curved architraves for doors and windows online, get an instant price, and we deliver them ready to install - in MDF or timber, to your profile. No drawing to send off, no per-arc setup fee, no two-week wait.

Answering their questions (self-serve framing)

- Ball-park inc material? - instant price in the builder.
- Match my profile? - design it to your spec online.
- Turnaround? - made to order, delivered ready to install.

Note for decisions

Low volume, high value - a \$3.6k single job exists. Worth a small targeted campaign (arched-doorway / curved-head keywords) straight to the Architrave Builder. The no-setup-fee, instant-price angle is the wedge vs the incumbent.

Craftons marketing engine. Demand data = CNC Cut's bespoke curved jobs (the intelligence). Advertising target = the Craftons self-serve online builders. 21 Jul 2026. Working docs: repo research/market-intel/.
