

Architrave Builder - Pain-Led Copy

Curved architraves, designed online, delivered ready to install. Copy leads with the joiner's pain, then the Architrave Builder.

Product: Architrave Builder - design custom curved architraves for doors and windows online; delivered ready to install, no per-arc setup fee.

The pain - in their own words

Lead the copy with these. They're verbatim from real builders, concreters and our own enquiries. Make the customer feel seen, THEN show the product.

"That beats the hell out of soaking MDF and hoping it will flex enough."

- joiner, DIYnot - the bending gamble

"I've seen a 100mm strip of MDF left out over the weekend bend like a pretzel."

- joiner, DIYnot

"You'll have to curve the timber door stop around the upper arch. Like boat builders curve timber."

- tradie, Whirlpool - it's boat-builder-level craft

"The PVC supplier said I wouldn't get a 180 degree bend with their product... so I'll have to make a laminated jamb."

- builder, Whirlpool - can't source it, forced to DIY

"\$200 setup fee for each size arc."

- Australian Moulding (competitor) - the setup-fee gouge

Pain-led headlines (the pain hits first; the product is the escape)

Soaking MDF and hoping it flexes? It bends like a pretzel - or snaps.

Curving an architrave by hand is boat-builder work. And they still charge \$200 just to set up the arc.

Can't find a curved architrave that fits your arch? Stop laminating your own.

The arched doorway that becomes a weekend of soaking, clamping and swearing.

No \$200 setup fee. No pretzel. Just the arch, cut to fit.

The turn - product as relief

The Architrave Builder designs your curved architrave to your exact arch online - MDF or timber, priced on the spot, no setup fee, delivered ready to install. No pretzel, no lamination, no gouge.

The ad (pain -> agitate -> relief -> CTA)

Bending an architrave around an arch by hand is boat-builder work - soak the MDF, hope it flexes, watch it bend like a pretzel or snap. And when you finally find someone who'll make it, they want \$200 just to 'set up the arc'. The Architrave Builder designs your curved architrave to your exact arch online: instant price, no setup fee, delivered in MDF or timber, ready to install. [Design your arch -> Architrave Builder]

Voice notes

Builder-to-builder, dry, no emoji. Their words: 'bent like a pretzel', 'soaking MDF and hoping', 'like boat builders curve timber', '\$200 setup fee'. Low volume but the biggest tickets - worth a sharp, pain-led niche campaign.

Note for decisions

Highest value per job (~\$2,300; a \$3,641 single job). The 'pretzel + \$200 setup fee' pain is a clean wedge vs the incumbent. Small, targeted, pain-led.

Craftons marketing engine. Pain language = real customer voice (CNC Cut enquiries + forums/YouTube/reviews). Drives the self-serve online builder. 21 Jul 2026.
