

Radius Pro - Findings & Copy Notes

Curved plywood wall plates, cut to set-out. The proven workhorse. Copy drafts for Lee to approve; guarantee lines gated.

Snapshot

Metric	Value
Win rate	73% (24 won / 9 stalled) - highest
Avg job value	~\$600 - \$1,650
Volume	Highest of the three
Repeat buyers	Perfetto, Invoke, Glenvill, LBA, Frameworks, Montegar, Marc Cotsis (the 20%)

Who buys & how

Builders needing curved top & bottom plates cut to their set-out. They already trust this product and reorder - the marketing job is to reach more of the same buyer and quote them fast.

Their words (use these verbatim in copy)

- top and bottom plates
- cut to your set-out
- the radius is to the outside of the wall
- 1300mm radius into straight tails
- tails cut to suit on site
- staggered joints
- whatever ply you normally use

What they ask

- How much? / send a plan, get a price
- Can you cut from my CAD/PDF?
- Turnaround - can it be ready this week?
- Which ply/thickness (often self-specified: 'happy to use 17mm form ply')

The angle to lead with

Lead on SPEED + 'we cut to your radius from your plan'. This buyer converts well already - win by being fast and effortless. No hand-templating, no bog-and-sand.

Copy notes

Hero line

"Curved walls? Send your set-out - we CNC-cut your top and bottom plates to your radius, tails cut to suit on site."

Headline options (each passes Urgent-Unique-Specific-Useful)

"Stop hand-cutting curved wall plates. Send the CAD - we cut them to your radius."

"Curved top and bottom plates, cut to your set-out - even a 1300mm radius that runs into straight tails."

"Your curved walls, plated and ready to frame. Tails cut to suit on site."

"Send a plan, get a price. Curved wall plates, CNC-cut to your radius."

"No more templating curves by hand. Send the plan, we cut the plates."

Lead paragraph (landing / ad)

Chasing curved top and bottom plates? Send us the CAD - or just a marked-up plan - and we'll cut them to your radius on the CNC: staggered joints, straight tails cut to suit on site, ready to frame. Price back fast, plates turn up ready to fix.

Answering their questions

- Can you cut from my CAD? - Yes, PDF or DXF (or a marked-up photo).
- Turnaround? - state a real, fast number; it decides these jobs.
- Which ply/thickness? - we'll spec it for your radius if you're unsure.

Note for decisions

The safe, high-conversion line. Priority = reach more builders with curved jobs + quote them same-day. Feed the winning headline to campaigns/adwords/.
