

Curved Formwork & Seats - Findings & Copy Notes

Curved concrete formwork, seats, insitu walls - the Formwork Builder. Big demand, 50% conversion: the opportunity. Guarantee lines gated.

Snapshot

Metric	Value
Win rate	50% (14 won / 14 stalled) - the opportunity
Avg job value	~\$1,000 - \$2,800
Buyers	Concreters, formworkers, landscapers
Key names	Concretum, Top Form, Policrete, Formworx, Cubic, Burrows, Concrete Architecture, Earthscape

Who buys & how

Concreters and formworkers - who CAN build the formwork themselves. So the copy must beat their own method on speed, finish and the slog, and own the 'which ply for a good finish' question they keep asking. Many stalls here are un-quoted, not rejections - quote these FAST.

Their words (use these verbatim in copy)

- curved formwork
- top and bottom plates and face ply
- l/m rate (lineal metre)
- perfect curve
- off-form finish
- we can build on site
- thickness of bendy ply - your recommendations
- cut to your set-out

What they ask

- Can you give me an l/m rate?
- What ply for the outer curved perimeter to get a good finish?
- Is this achievable?
- Turnaround - can it be ready [Friday]?

The angle to lead with

Beat their in-house method. Lead on SPEED + guaranteed FINISH + no-slog, and own the ply decision. This is the biggest upside - and quoting speed matters most here.

Copy notes

Hero line

"Stop hand-building your curved formwork. We CNC-cut your top and bottom plates and face ply to your radius - a perfect curve, ready to pour."

Headline options (each passes Urgent-Unique-Specific-Useful)

"Bending form ply around a radius by hand is a slog. Send the set-out - we cut it to your line."

"Curved bench seat? We cut the formwork to your radius - priced by the lineal metre."

"Which ply gets a clean off-form finish? That's our call. Send the radius, we'll spec it and cut it."

"Perfect curve, every time - CNC-cut to your set-out, not freehand around a stringline."

"A day bending ply, or a set-out email? Send us the radius - we cut the formwork."

Lead paragraph (landing / ad)

Pricing a curved seat or an insitu curved wall? Send your set-out and we'll CNC-cut the top and bottom plates and face ply to your radius - the exact curve, ready to assemble and pour. We'll tell you which ply and thickness gets the finish you're after (the bit most stuff up). Priced by the lineal metre, turned around fast.

Answering their questions

- l/m rate? - Yes, priced per lineal metre.
- What ply for the finish? - we recommend and supply it.
- Achievable? - send the radius, we'll confirm and quote fast.

Note for decisions

Highest-upside product: lifting conversion off 50% is a big revenue unlock, and the lever is mostly SPEED OF QUOTE + a finish-beating offer. Prioritise a same-day l/m ball-park for these.

Craftons marketing engine - built from first-party data (ClickUp Job List + customer enquiries + Quotient) and market research. 21 Jul 2026. Full working docs: [repo research/market-intel/](#).
