

Craftons x ContentOS

What is ContentOS?

ContentOS is a 3-phase programme to take you from posting randomly and hoping for leads to building a trustworthy brand that reliably attracts bigger and better clients - in about 90 days.

This programme is based on the work I did for Plot Joinery, which grew their audience from 15K → 140K+ followers and generated over 7-figures in content-attributed *quotes* (not just leads) in our first 12 months.

Here's how it works:

Phase 1: Plan

Most owners make content without a strategy - which leads to content that doesn't perform, which results in *years* of delay in building your audience and generating content-driven leads.

What we do instead is we get *crystal clear* on *what to post*, to build the foundation for your brand and start attracting your ideal customers.

Phase 2: Execute

Founders need efficient workflows to film, edit and publish their content consistently.

If they don't, they either get pulled away from the business as they try to make their content, or they leave their content as an afterthought as they put out fires.

So that's why in Phase 2 we'll build lean workflows for you (just like I built for Plot), so you can make lots of great content consistently - without it eating up all of your time.

Phase 3: Scale

Plenty of businesses get to the point of posting consistently, but they let their strategy stop there.

They keep posting and posting, but don't know how to *track what's working* or figure out how to *double down* on their winning ideas.

This means they hit a ceiling. They're busy creating the content but they're not seeing the lead flow or revenue growth they expected.

So what we do instead is *optimise what's working* so you can enjoy the compounding effects of building a brand, and bring in a consistent flow of content-driven leads.

Deliverables:

- **Brand Onboarding** - To get you up and running and start getting results.
 - **Weekly 1:1 Content Sessions** - Provides you with clarity on what you need to do each week, and accountability to keep your lead generation on-track.
 - **24/7 Text Support** - So you never feel lost if you have a question.
 - **All Your Videos, Edited** - Shortcut a decade of editing experience and never touch a timeline again so you can focus your time on your business and your family.
-

Investment:

The services I provide for Plot are an investment of \$12,000/mo (AUD).

This is also the level of investment I will be asking of business owners in the future, for this programme.

But as my priority right now is to bring in the right people and get them great results (selfishly, to get great case studies)...

This programme will start at \$7,000/mo as a 3-month commitment.

Limited to 3 spots to ensure quality of delivery.
